## **Cisco UCS Director**

### **Introduction to Cisco UCS Director**

- Overview of Cisco UCS Director
- Key features and benefits
- Evolution of data center management

### **Cisco UCS Director Architecture and Components**

- Architecture overview
- Components and their roles (Control Center, Device Manager, etc.)
- Integration points with Cisco and third-party systems

### **Deployment and Initial Setup**

- System requirements and prerequisites
- Installation methods (physical appliance vs virtual appliance)
- Initial configuration and setup wizard

### **UCS Director Administration**

- User management and authentication
- Role-based access control (RBAC)
- Tenant management and multi-tenancy concepts

## **Infrastructure Management**

- Managing compute resources (Cisco UCS)
- Managing storage resources (Cisco storage integrations)
- Managing network resources (Cisco Nexus, etc.)

## **Service Catalog**

- Creating and managing service offerings
- Customizing service catalogs
- Self-service provisioning workflows

## **Orchestration and Automation**

- Workflow creation and customization
- Task automation using policies
- Integrating with external systems (APIs, SDKs)

## **Monitoring and Reporting**

- Performance monitoring and metrics
- Resource utilization and capacity planning
- Custom reporting and analytics

## **Advanced Topics**

- High availability and disaster recovery strategies
- Security best practices and compliance
- Upgrading and maintaining UCS Director

## **Use Cases and Real-world Applications**

- Implementing use cases (virtualization, cloud management, etc.)
- Case studies and practical scenarios
- Troubleshooting common issues

## **Exam Preparation (If applicable)**

- Overview of certification exams (if training for certification)
- Practice exams and test preparation tips

## **Additional Resources**
