DOCUMENTUM COURSE CONTENT

Enterprise Content Management Overview

- 1. Enterprise Content Management (ECM) Overview,
- 2. ECM Challenges, Need for ECM,
- 3. ECM Components,
- 4. ECM Key players

Documentum Overview

- 1. EMC Documentum Training Overview,
- 2. EMC Documentum Solutions,
- 3. Documentum Key Characteristics

Documentum Product Overview

- 1. Documentum Training Products
- 2. Content Services
- 3. Process Services
- 4. Repository Services
- 5. Integration Services
- 6. Administration & Development

- 7. Documentum CenterStage
- 8. My Documentum Offline

Documentum Concepts Overview

- 1. Content Server
- 2. Doc base
- 3. Doc broker
- 4. DFC
- 5. WDK
- 6. Documentum Objects
- 7. Cabinets & Folders
- 8. Users and Groups
- 9. Virtual Document
- 10. Alias Set
- 11. ACLs
- 12. Virtual Document
- 13. Workflow
- 14. Lifecycle

Objects and Types

- 1. Introduce and describe Object,
- 2. Introduce and describe Types,
- 3. Type Hierarchy and inheritance,
- 4. Define object ID,
- 5. Type Storage,

- 6. Lightweight SYS Objects,
- 7. Shareable Objects,
- 8. DQL

Users and Privileges

- 1. Users, User Authentication
- 2. Client capability
- 3. Basic privileges,
- 4. Extended privileges,
- 5. Creating Users,
- 6. Useful DQL Queries

Groups and Roles

- 1. Groups
- 2. Creating Groups
- 3. Roles
- 4. Creating Roles
- 5. Useful DQL Queries

Object Security

- 1. Object Permissions
- 2. Permission Sets
- 3. Special Conditions
- 4. Folder Security
- 5. Creating a Permission Set
- 6. Assigning Permissions
- 7. Advanced Security

- 8. Useful DQL Queries

System Administration Overview

- 1. System Administrator Tasks,
- 2. Documentum Administrator,
- 3. Content Server Installation and Configurations,
- 4. Methods & Jobs

Alias Sets

- 1. Introduction to Aliases
- 2. Alias Set, Defining Alias
- 3. Kinds of Alias
- 4. Creating Alias Set
- 5. Alias Scope
- 6. Alias Resolution Scopes
- 7. Useful DQL Queries

Custom Types

- 1. Introduction to Custom Types,
- 2. Super Types, Permissions & Null type,
- 3. Types and Data dictionary,
- 4. Benefits of the Data Dictionary,
- 5. Creating Custom Type using Composer,
- 6. Document Templates,
- 7. Modifying Custom Types, Dropping Custom Types, Useful DQL Queries

Virtual Documents

- 1. Virtual Documents Definition and Benefits
- 2. Create Virtual Documents
- 3. Create a Snapshots
- 4. Add components to a virtual document
- 5. Virtual Document Preferences
- 6. XML Management
- 7. Useful DQL Queries

Object and Content Relationship

- 1. Describe document content,
- 2. Introduction to content object,
- 3. How content files and objects are related,
- 4. Brief on Primary content & Renditions, Page number,
- 5. Rendition source

Lifecycle Overview

- 1. Difference between Lifecycle & Workflows
- 2. Describe Entry Criteria
- 3. Entry Actions, and
- 4. Post-entry Actions
- 5. Extended Permissions with lifecycles
- 6. Lifecycles & Alias sets
- 7. Lifecycle Related Actions
- 8. Lifecycle States, Useful DQL Queries

Workflow Basics and Workflow Manager

- 1. Workflow Concepts
- 2. Workflow Templates
- 3. Activities, Performers
- 4. Flows and Packages
- 5. Building a complex workflow
- 6. Simple workflow
- 7. Path selection
- 8. Dynamic performer
- 9. Advanced Features
- 10. Automated activities
- 11. Workflow Manager

Search

- 1. Searching Overview
- 2. Simple Search
- 3. Advanced Search
- 4. Search Results
- 5. Saving Searches
- 6. Search Preferences
- 7. Subscriptions
- 8. Shortcuts
- 9. Useful SQL queries

Documentum Query Language

- 1. DQL Overview

- 2. Advanced DQL
- 3. DQL tools: IDQL

Business Object Framework (BOF)

- 1. BOF Overview
- 2. Global registry
- 3. Service Based Objects (SBO)
- 4. Type Based Objects (TBO), Aspects

Documentum Foundation Services(DFS)

- 1. DFS Overview
- 2. OOTB Platform Services, DFC Vs DFS, Building DFS Service

Documentum Composer and Application Builder D2

- 1. Overview
- 2. Configuration
