- Creating Attribute Dimensions

## **Loading Data**

- Data Load Options
- Loading Data from Flat Files
- Performing Free-Form Data Loads
- Loading Data with Rules Files
- Obtain tablespace information
- Loading Data from SQL Data Sources

## **Calculating the Essbase Analytics Database**

- Outline Calculations
- Calculation Scripts
- Two-Pass Calculations
- Dynamic Calculations
- Dynamic Time Series

## **Retrieving Data**

- Smart View Overview
- Connecting to the Analytic Server
- Retrieving Multidimensional Data into Two-dimensional Spreadsheet Reports
- Navigating Through Spreadsheet Reports
- Manipulating Multidimensional Data
- Installing the Web Server
- Smart View Options

## **Advanced Spreadsheet Reporting**

- Updating Data on the Analytic Server
- Creating Free-Form Reports
- Selecting Members
- Creating Reusable Queries
- Extending the Spreadsheet Environment with Visual Explorer

## **Storing Analytic Data**

- Data Storage Options
- Block Storage
- Aggregate Storage

## **Integration with BI+ Reporting Tools**

- BI+ Architecture
- Workspace Overview and User Interface
- Browsing the Repository
- Working with BI+ Content
- Previewing Financial Reports
- Grouping Financial Reports into Books

## **Extending Analytic Reporting Using Web Analysis**

- Web Analysis Overview
- Viewing Web Analysis Documents in Workspace
- Analyzing Query Results in Workspace
- Creating Web Analysis Documents
