IBM Lombardi BPM Admin

Introduction to IBM Lombardi BPM

- Overview of Business Process Management (BPM)
- Introduction to IBM Lombardi BPM
- Features and Capabilities
- Use Cases and Applications

Business Process Modeling

- Understanding Business Process Modeling
- Business Process Modeling Notation (BPMN)
- Modeling Business Processes with Lombardi BPM
- Process Design Best Practices

IBM Lombardi BPM Architecture

- Architecture Overview
- Components of IBM Lombardi BPM
- Process Designer
- Process Center
- Process Server

Installation and Configuration

- Pre-installation Requirements

- Installation Process
- Configuring Lombardi BPM Environment
- Setting up Users and Permissions

Process Modeling with Lombardi BPM

- Designing Process Models
- Defining Process Variables and Data Objects
- Adding Activities and Gateways
- Sequence Flow and Message Flow

Human Task Management

- Managing Human Tasks
- Task Assignment and Routing
- Task Escalation and Notification
- User Interfaces for Task Management

Process Implementation

- Implementing Process Models
- Integrating with External Systems
- Data Mapping and Transformation
- Error Handling and Compensation

Process Monitoring and Analytics

- Monitoring Process Instances
- Performance Metrics and KPIs
- Business Activity Monitoring (BAM)
- Process Optimization Techniques

Process Versioning and Deployment

- Versioning Process Models
- Deploying Process Applications

- Release Management
- Rollback Strategies

Security and Access Control

- User Authentication and Authorization
- Role-Based Access Control (RBAC)
- Data Encryption and Privacy
- Auditing and Compliance

Integration with Other Systems

- Integrating with Enterprise Applications
- Web Services Integration
- Message Queue Integration
- API Integration

Advanced Topics in Lombardi BPM

- Advanced Process Design Patterns
- Complex Event Processing (CEP)
- Decision Management and Business Rules
- Case Management

Best Practices and Optimization

- Best Practices for Lombardi BPM Development
- Performance Optimization Strategies
- Capacity Planning
- Error Handling and Troubleshooting

Case Studies and Real-world Examples

- Industry Use Cases
- Customer Case Studies
- Project Implementation Examples

Certification Preparation

- Overview of IBM Lombardi BPM Certifications
- Tips for Exam Preparation
- Sample Questions and Practice Exams

Community and Resources

- IBM Lombardi BPM Community Resources
- Online Forums and Communities
- Recommended Books and Tutorials
- Continuing Education Opportunities
